Learning to Code

Please keep in mind that you will need to research which of the following best fit your personality and learning style. Also keep in mind that there may not be a match here for you. You may need a coach. See section below titled “[Coaching](#)”.

Sites That Can Take You From A to Z

- [W3Schools](#) (Free)
- [FreeCodeCamp](#) (Free)
- [Codecademy](#) (Paid service)
- [Udemy](#) (Paid service)
- [Zenva Academy](#) (Paid service)

Tutorial Sites

- [YouTube](#) (Free with ads or Paid for if you want to remove ads. Below are some suggested channels)
 - [Code Explained](#)
 - [Code with Ania Kubów](#)
 - [DevEd](#)
 - [Fun Fun Function](#)
 - [LevelUpTuts](#)
 - [Programming with Mosh](#)
 - [Steve Griffith - Prof3ssorSt3v3](#)
 - [Traversy Media](#)
 - [Web Dev Simplified](#)
 - [Wes Bos](#)
- [Skillshare](#) (Paid service)
- [Wes Bos Courses](#) (Some of these are paid, some are free. Wes is a veteran developer and an excellent teacher)
- [Level Up Tutorials](#) (Paid service, but Scott and his crew are veterans developers who are also excellent teachers)

Coaching

I was stuck in “tutorial hell” and was having trouble figuring out how to make the options above work for my individual and personalized projects. I ended up getting a coach. I know this option may not be a good fit for everyone. That may be for personal, financial, or just learning-style reasons. But if you think you might do better working with someone who will keep you accountable, feel free to reach out to [Cristian Florea on LinkedIn](#). You can also check out his website www.floreacristian.com to see some student testimonials as well as my “exit interview” type video (scroll down to the video titled “Beth - Remote Frontend Dev 8 Months”).

He gave me a solid road map, reviewed my code, let me review other students' code (super important since you'll need to learn to review other developers' code in every single work environment), and helped me with the interview process. Believe it or not he did not ask me to include this. 😊

Even if you choose not to go with Cristian, make sure you do your homework on whichever coach you decide to go with. Make sure you ask for references and talk to their previous students. Find out why the coach worked and maybe the areas the coach could have done better for the students. Some coaches talk a big talk on social media and can't back it up once their students are contacted.

DON'T BE LAZY! Your career is on the line!

Sites for Web-Based Coding

All of the options below are free.

- [Code Sandbox](#)
- [Codepen](#)
- [JSFiddle](#)

Applications to Install on Your PC

I work with Windows so sorry Mac users, I got nothing. All of the options below are free.

- [Visual Studio Code](#) (not to be confused with Visual Studio)
- [Sublime](#)
- [Atom](#)
- [Notepad++](#) (if you want to travel back in time about 20 years, but hey, to each their own)

Resources

HTML

- [HTML Semantic Elements](#)
- [HTML Color Code Tool](#)
- [HTML Entities](#)
- [Font Awesome](#)

CSS

- [Color Names](#)
- [Gradient Generator](#)
- [Bootstrap](#)
- [CSS-Tricks](#)

JavaScript

- [Keycode Finder](#)
- [JSBin](#) (for debugging and testing code in-browser)
- [JavaScript In-Depth Tutorial](#) (Might be overwhelming if you aren't already familiar with JS)

React

- [React Docs](#)

Miscellaneous

- [Trello](#) (Project Organization)
- [Notion](#) (Project Organization)
- [Beginner's Guide to Web Development Cheat Sheet](#)
- [Vercel](#) (Project Deployment, free depending on your need)
- [Netlify](#) (Project Deployment, free depending on your need)
- [Free Logo Maker](#) (For your portfolio project - that you'll be showing off in interviews 😊)
- [The Noun Project](#) (Free icons and photos)
- [Pixabay](#) (Free photos for personal use)
- [Pexels](#) (Free photos for personal use)
- [Unsplash](#) (Free photos for personal use)
- [Public APIs](#)

Getting the Job

Interview Practice

DO NOT SKIP THIS STEP!!! If you practice answering interview questions, you will be more confident in your answers and that confidence will show even if you don't realize it.

- [Brainscape](#) - Flashcards
 - Does NOT allow HTML input
 - Has a mobile app
- [Chegg](#) - Flashcards
 - Does allow HTML input
 - Has a mobile app
- Interview Questions:
 - I would include websites, but they get outdated so quickly that you really need to do that research on your own.
 - Google phrases like "JavaScript interview questions," "HTML interview questions," and "CSS interview questions."
 - Google "Coding interview tests" or "Coding interview assessments".

- These can be found on [Codecademy](#) and [Udemy](#) as well.
- I am literally not joking when I say **DON'T BE LAZY!!** This interview prep is probably one of the most important things you can do in getting a job.
- **DON'T** take shortcuts!
- **DON'T** use someone else's flashcards.
- **DON'T** just read the questions you find - rewrite/retype them and study them!
- **DO** get lots of rest.
- **DO** drink plenty of fluids.
- **DO** take care of yourself.
- Being well-rested and feeling good will also keep you feeling good, fresh, and sharp during the interviews.

Sites for Project-Based / Contract Work

- [Fiverr](#)
- [Upwork](#)

Sites for Full-Time Positions

Don't be lazy with your cover letters. Check out the company's website and tailor the cover letters to each company. It's time consuming and can be tedious, but it could get you the job.

- [Indeed](#)
- [Glassdoor](#)
- [Monster](#)
- [Angellist](#)
- [LinkedIn Jobs](#) (I did not have very much luck through LinkedIn Jobs, but don't let that stop you)

Networking

Post regularly about your journey (good and bad, struggles and triumphs). Post what you're learning and the progress you're making. Future employers will notice it!

Best sites for Networking

1. [LinkedIn](#)
2. [Facebook Groups](#)

Staying Up-To-Date

Podcasts

There are many more, but here are just a few that I've listened to and enjoyed.

- [Syntax.FM](#)
- [Frontend First](#)
- [JS Party](#)
- [Frontend Happy Hour](#)

Social Media

- [LinkedIn](#)
- [Facebook Groups](#)
- [GitHub](#)

In closing

These resources should help get you moving in the right direction, but feel free to reach out to me by:

- Visiting my website at www.elizabethwfranklin.com
- Messaging me on [LinkedIn](#) (Elizabeth Franklin)
- Checking out my [GitHub](#) (username redliz5808) OR
- Emailing me directly at elizabethwfranklin@gmail.com (I don't check it super often, so expect a few days delay before I respond 😊)

Finally - Enjoy some beautiful web development by visiting justforfun.io.
