Professional Summary

Technical trainer and web technology specialist with 15+ years of experience translating complex technical systems into clear documentation, structured training, and accessible learning experiences. Background includes frontend development, CMS administration, Git-based workflows, accessibility testing, technical documentation, workshop facilitation, and cross-functional support. Known for making technical concepts approachable for non-technical and mixed-skill audiences while improving team consistency, onboarding, and long-term maintainability.

Willing to Relocate to: Los Angeles County, CA; Charlotte, NC;

Work Authorization: US Citizen

Training & Curriculum Highlights

- Designed and facilitated a 5-session WordPress workshop series teaching artists how to build and maintain portfolio websites, manage hosting/domain accounts, configure WooCommerce, list products, and process orders.
- Mentored team members on Git-based source control, code review practices, and ongoing codebase maintenance.
- Created standardized code conventions and technical documentation to support onboarding, training, and long-term codebase consistency.
- Produced user guides, troubleshooting documentation, and best-practice materials for software, hardware, and mobile devices.
- Delivered security and compliance training to new hires and technical career-development workshops for staff.
- Conducted accessibility testing and created remediation plans to help teams improve WCAG-aligned web experiences.

Skills

Training & Curriculum: Technical training, workshop facilitation, curriculum planning, onboarding support, user guides, step-by-step documentation, knowledge base content, technical editing, proofreading, learner support

Web & CMS: WordPress, WooCommerce, Umbraco CMS, Wix, HTML, CSS, JavaScript, Bootstrap, Razor Markup, PHP, DNS, hosting, Git, GitHub

Accessibility & QA: WCAG, semantic HTML, WAVE Accessibility Analyzer, WebAIM, cross-browser testing, accessibility remediation planning

Collaboration Tools: Google Workspace, Zoom, Slack, Asana, SharePoint, Microsoft Office

Soft Skills: Adaptability, Analysis, Communication, Conflict Resolution, Critical Observation, Cultural Intelligence, Empathy, Leadership, Organization, Problem-Solving

Work Experience

Customer Call Center Representative III

Leidos QTC Health Services | Remote

January 2026 to Present

- Translate procedural requirements into clear, step-by-step guidance for reserve-duty military service members navigating medical appointment scheduling, provider coordination, and documentation expectations.
- Maintain accurate service member records, call notes, appointment details, and procedural documentation across internal systems.
- Provide informal peer support and basic technical coaching to team members using call center systems and communication tools.
- Use patient, approachable communication to explain complex scheduling, provider, and documentation processes to service members.

Sr. Frontend Developer

Gryt Health | Remote

February 2024 to May 2025

- Created and maintained reusable frontend patterns, internal documentation, and implementation guidance to improve consistency across client platforms.
- Translated complex Figma designs and technical requirements into accessible web interfaces while helping team members understand implementation standards.
- Led frontend QA validation, documenting accessibility, responsiveness, and cross-browser issues for developers and stakeholders.
- Supported parallel project delivery by organizing technical requirements, documenting workflow expectations, and clarifying implementation steps across multiple client builds.
- Partnered with team members to improve maintainability, code readability, and repeatable development practices.

Umbraco Frontend Developer

Gryt Health | Remote

September 2021 to February 2024

- Trained team members on Git-based source control, code review expectations, and codebase maintenance practices.
- Developed standardized code conventions and internal documentation to improve onboarding, reduce knowledge gaps, and support consistent development practices.
- Created technical references and implementation notes for reusable Umbraco components, Razor markup patterns, and frontend workflows.
- Translated Figma wireframes into responsive web experiences while documenting technical decisions and accessibility considerations for team reference.
- Provided approachable technical support to team members navigating CMS, frontend, and workflow questions.

Systems Analyst

Williamsfield Valley Veneer, Inc. | Williamsfield, OH

November 2017 - September 2021

- Provided technical support and step-by-step troubleshooting for staff across workstations, servers, mobile devices, software tools, and security equipment.
- Educated staff on technology workflows, file organization, cybersecurity awareness, backup procedures, and proper system usage while migrating the company from paper-based filing to a structured digital filing system.
- Planned and facilitated monthly and annual safety trainings, documented internal processes and procedures, and maintained technical workflows to support staff training, compliance, and operational consistency.

Systems Analyst

Bruce & Merrilees Electric Co. | New Castle, PA

May 2010 to October 2017

- Establish standardized documentation practices and produce detailed network/system diagrams mapping corporate sites, server environments, and backup infrastructures.
- Provide security and compliance training to all new hires as well as technical career-development workshops to all staff.
- Create and maintain user guides for software and hardware (including mobile devices), simplifying complex topics into clear how-tos, step-by-step troubleshooting, and best practices.

Selected Training, Documentation, & Accessibility Work

How to Build an Artist Website

LOOP Youngstown | January 2025 - May 2025

- Designed and delivered a 5-session beginner-friendly web curriculum for artists and creative professionals.
- Taught participants how to build and maintain WordPress portfolio websites using hosting, domain, and CMS tools.
- Created practical instruction around WooCommerce product listings, shop settings, and order processing.
- Empowered learners to become administrators of their own websites instead of relying on ongoing developer support.
